Evident . I-REC Code for Electricity SF-02: Production Facility Registration

1 Introduction

The following multi-part form included within this document is to be used by all Registrants wishing to register Production Facilities. Evident reserves the right to request further information in addition to that requested in this form where, in its reasonable opinion, such information is required to establish the eligibility, configuration, operation, ownership, or attribute rights of the Production Facility.

The completed form should be attached to a Production Facility registration within the Evident Registry. Where an online system is available for Production Facility registration within the Evident Registry that system may, at the sole discretion of the responsible Issuer, be used to replace the requirement to submit form *SF-02: Production Facility Registration* through the Evident Registry.

Form *SF-02A: Registrant's Declaration* shall be submitted with all registrations.

Form *SF-02B: Production Group Template* shall be submitted only for registrations of Production Groups.

Form *SF-02C: Owner's Declaration* shall be submitted for every registration where the Registrant is not the Facility Owner.

Issuers may, at their discretion, require completion of this form, or a translation, in another language **in addition to English**.

This document is correct at the date of issue, however Evident may change the information requirements without notice where necessary for compliance with national legislation or to preserve the integrity for the I REC(E) market.

<p>On behalf of the Registrant, [<i>insert Registrant organisation name here</i>], I agree to be subject to the I-REC Code for Electricity and warrant that the information contained in this application is truthful and exhaustive.</p> <p>Any planned changes concerning the information given in this form will be announced in advance to the Facility Verifier (if any) and the Issuer. Any unplanned changes will be reported to the Facility Verifier (if any) and the Issuer at the first possible occasion.</p> <p>The Production Facility Owner and the Registrant as their agent accept the possibility of unannounced control and auditing visits to their own premises and/or the premises of the Production Facility, as prescribed in the I-REC Code for Electricity.</p> <p>I confirm that all necessary permissions of the Production Facility Owner have been granted to the Registrant and we therefore undertake that, for the same units of electrical energy, our organisation will not receive or apply for any certificates or other instruments representing the associated renewable or carbon attributes or the calculated displacement (‘offset’) of these attributes from the electricity production. We also, to the best of our knowledge, have the right to separate renewable attributes from the associated physical electricity generation and are not required by legislation or contract to retain these attributes for any reason.</p>

Declaration of Attribute Generation and Ownership

Please accept this letter as granting *[insert Registrant organisation name here]* the exclusive right to act in respect of trading all renewable energy attributes (representing the environmental, economic, and social benefits associated with the generation of electricity) including all associated carbon attributes with *[insert Production Facility name here]* from *[insert Effective Registration Date here]* until *[further notice/[insert end date here]]*. The rights to these attributes are in our exclusive ownership at the time of signing.

We understand that the attributes associated with renewable electricity generation are different and distinct from instruments that may be granted under an emissions reduction scheme that have been calculated as displacement ('offset') against a business as usual case.

In granting this permission we accept that the ownership of the associated renewable and carbon attributes from the generation of electricity may be passed to *[insert Registrant company name here]* in the form of I REC(E)s as defined in the I REC Code for Electricity. We have received, or will receive, valuable consideration for the delivery of these attributes. We therefore undertake that, for the same units of electrical energy, our organisation will not receive or apply for any certificates or other instruments representing the associated renewable or carbon attributes or the calculated displacement ('offset') of these attributes from the electricity production. We also, to the best of our knowledge, have the right to separate renewable attributes from the associated physical electricity generation and are not required by legislation or contract to retain these attributes for any reason.

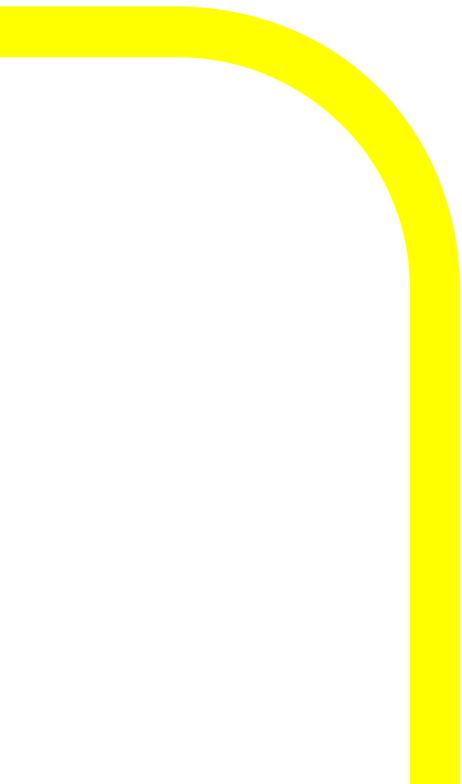

Yours sincerely,

On behalf of *[insert owner name here]*

Ev.
